EDUCATION

Ashokrao Mane Group of Institutions, Vathar

Jul 2022 – Jun 2025

Bachelor of Technology in Computer Science and Engineering

CGPA: 6.92

TECHNICAL SKILLS

Languages & Mobile: Dart, Java, Flutter, RESTful APIs, Node.js, Express.js, MongoDB

Database & Storage: Firebase Realtime Database, Hive, Local Push notifications, Flutter Secure Storage

Architecture & State: GetX, Bloc, Clean Architecture, MVC

Tools & Testing: Git, GitHub, Jira, Android Studio, VS Code, Postman

EXPERIENCE

Mitt Arv Technologies Pvt. Ltd

Apr 2025 – Apr 2026

Software Engineer – Hybrid / Remote

- Engineered cross-platform mobile applications using Flutter, improving app UI/UX and performance by 30%.
- Resolved complex **GetX state management** issues and introduced a modular, maintainable app architecture.
- Optimized **RESTful API** consumption and data handling for reliable, scalable backend communication.
- Delivered production-ready features following clean coding practices, reducing post-release defects.

Cryptographic Solutions

Jul 2024 – Sep 2024

Flutter Developer Intern – Remote

- Built a Flutter-based car wash mobile application from scratch, improving UI consistency and feature delivery.
- Implemented Riverpod state management and integrated REST APIs for efficient backend communication.
- Conducted debugging, code reviews, and functional testing, reducing runtime issues and improving application stability.

Digital Development Leadership Group

Feb 2024 – Mar 2024

Mobile Application Developer Intern – Remote

- Contributed to a Flutter-based ride services application supporting real-time ride workflows and user operations.
- Integrated Firebase services and enhanced **Google Maps** UI by 50%, contributing to Stripe payment gateway integration.

PROJECTS

ExpenseFlow (Offline-First Expense Tracker) – *Flutter, Dart, Clean Architecture, Bloc, Hive* GitHub

- Integrated an on-device **AI assistant (Google Gemma + TensorFlow Lite)** for conversational spending analysis – enabling private, offline financial insights with zero API cost.
- Built a cross-platform expense tracking app with **offline-first local storage via Hive** and a background sync engine that reconciles with Cloud Firestore on reconnect.
- Architected the app with Clean Architecture and **GetIt** for dependency injection, using Bloc for state management and **Go Router** for navigation.

BeFit (Fitness App) – *Flutter, Dart, Clean Architecture, Bloc, Firebase, FL charts*

GitHub

- Designed and delivered a Flutter-based fitness tracking application with responsive UI and smooth navigation.
- Architected the application using **Clean Architecture and Bloc state management** to ensure scalability.
- Implemented **real-time step tracking via the pedometer package for live on-device sensor data**, with Firebase and fitness APIs for storage and visualization.

ACHIEVEMENTS & OPEN SOURCE

- Published **"Flutter Body Part Selector,"** a reusable and customizable Flutter UI package, on **pub.dev**.
- Completed **250+ coding challenges on LeetCode**, showcasing strong foundations in data structures and algorithms.
- Secured **3rd rank in Algo Expert (Reflex)** among 200+ participants, demonstrating strong problem-solving ability.
